EXPERIENCE

Software Engineer | Apr 2024 - Present

Measure Protocol Inc., (Remote)

- Led the migration of a mobile application to a complementary full-stack web platform using Next.js, increasing recruitment success by 10% and reducing recruitment costs by 3x.
- Led the migration of legacy native iOS and Android applications (Kotlin, Java) to a unified cross-platform codebase using React Native (Expo), reducing maintenance overhead and improving release velocity.
- Implemented a rule-based communications platform across Django, Celery, and Mailchimp, automating audience selection and bulk outreach for a 20k user panel and replacing manual campaign workflows.
- Built an internal LLM-powered data assistant using Next.js, FastAPI, and boto3, integrating with an AWS Bedrock agentic workflow connected to Firebolt; implemented lightweight RAG over table schema embeddings to improve query context.
- Dockerized five products, cutting developer environment setup time from one week to one day and significantly improving onboarding efficiency.

Resident Advisor | Aug 2022 - Dec 2023

SJSU International House, San Jose, CA, USA

- Lead community building initiatives for 60+ residents from 25+ countries.
- Managed \$4,000 technology fund obtained through partnership with Rotary fund to purchase equipment.

Software Engineer | Jul 2019 - Feb 2021

Triassic Solutions Pvt. Ltd., Trivandrum, KL, India

- Proof-of-Concept (PoC) App: Built in 1 month, securing a client contract by demonstrating an 80% reduction in MRI report parsing time using AWS Textract, Amazon Medical Comprehend, and S3.
- Delivery Service API: Developed a RESTful API for a logistics platform handling 50+ vendors and hundreds of daily orders.
- Automated Order Processing: Implemented asynchronous order handling with Celery, replacing manual CSV entry with an efficient batch-processing system.

EDUCATION

Master of Science in Software Engineering | Jan 2022 - Dec 2023

San Jose State University, San Jose, CA, USA

Relevant Coursework: Enterprise Application Development, Human-Computer Interaction, Cloud Technologies, Data Mining, Natural Language Processing

Bachelor of Technology in Computer Science | Aug 2015 - Aug 2019

Rajagiri School of Engineering & Technology, Kochi, KL, India

PROJECTS

Claude Chat Status (macOS Menu Bar App) | Jul 2026

github.com/abematt/claude-chat-status

- Built a macOS menu bar app to monitor concurrent Claude Code agent sessions across repos, with notifications when an agent needs input, errors, or finishes.
- Python lifecycle hooks write per-session JSON to disk; the app polls and renders it.
- Implemented deep-linking that routes clicks back to the originating VS Code window or terminal.
- **Technologies Used: Swift, AppKit, Python, Claude Code hooks, Apple Foundation Models.**

Few-Shot Learning with Atlas (NLP) | Nov 2023 - Dec 2023

github.com/abematt/CMPE-259-NLP-Final-Project-Presentation

- Fine-tuned Meta's Atlas NLP model on a dataset of 300+ questions, improving MCQ answering accuracy from 70% to 85%.
- **Technologies Used: Python, NLP, SJSU HPC Lab resources**

SKILLS

Languages: Python, JavaScript, Java, SQL

Frontend: React, React Native, Expo, Next.js, MUI DataGrid, SWR, TanStack Query, Shadcn, Tailwind CSS

Backend: FastAPI, Django, Celery

AI/LLM: RAG, Embeddings, LangChain, Hugging Face, OpenAI API

Cloud & DevOps: AWS Bedrock, boto3, Lambda, S3, SNS, CloudWatch, Docker, GitHub Actions

Databases: Firebolt, MongoDB, MySQL

Testing: Playwright, Jest

Tools: Git, Docker, Figma, Codex, Claude Code
